StarGuard Frequently Asked Questions

Q: Are StarGuard certifications valid at all aquatic facilities?

A: SAI does not restrict acceptance of the StarGuard certification, so in theory a StarGuard-trained lifeguard may work anywhere. Additionally, StarGuard has been evaluated and accepted by health departments in states that have a review process and training requirement.

Q: Is there a crossover program for currently certified lifeguards?

A: Yes. Lifeguards with current certification from a nationally recognized agency have immediate reciprocity and a 30-day grace period to attend a crossover orientation and have StarGuard skills competency and performance assessed.

Q: What is the length of time a StarGuard certification is valid?

A: One year. Competency and performance must be assessed annually for renewals.

Q: What is the minimum age for someone who wants to take the StarGuard course?

A: Age 16. An instructor may issue a variance into the course for a student who is 15 if the instructor has direct knowledge of the maturity of the student and believes he or she is ready for the challenges of the course. *Four Seasons Health Club requires students to be at least 15 years of age.*
